🌐 [harinandan-k](#)

📅 1st June 2006

👤 Profile

Dedicated BCA student specializing in robotics software engineering. Passionate about bridging hardware and software through hands-on project development and hardware optimization.

🔧 Skills

Languages

- Python
- C
- Bash
- SQL

Tools & Environments

- Arch Linux
- Git & GitHub
- Arduino

Specialized

- GenAI Prompt Engineering

👔 Professional Experience

EYantra Robotics Competition, IIT Bombay

Nov 2025

- Stage 1 Qualified

Design India Hackathon,

The Deens Academy and DQ Labs

Aug 2024

- Runner Up

Hands-On Drone Tech Workshop, Jain PNT Lab

Apr 2026

📖 Publications

Patent, Smart Traffic Signal Pole System for Dynamic Traffic Control (TraffiParkAI)

Sep 2025

Research Paper, Influence of Digital Payment Platforms on Gen Z in Bangalore

Jul 2024

🎓 Education

Bachelor of Computer Applications,

Jain Deemed-To-Be University - 8.947 CGPA

Jul 2024 – Present | Bangalore

Higher Secondary Education (PCMCs) CBSE,

Vidyaniketan Public School

Bangalore

Graduated 2024

🔗 Projects

Arduino TUI

2026

A user friendly Terminal User Interface built on top of Arduino CLI coded using python's Textual module.

2-player reflex system

2026

A competitive 2-player reflex system utilizing an Arduino microcontroller, integrating real-time buzzer alerts and physical button inputs.

Controller-Integrated Python Game Engine

on-going

A game build using PyGame module to bring the Android 16's Easter egg game to laptops using controller.

🧩 Clubs

PNT Lab

A university-level robotics research and development club supported by IIT Tirupati.

Jain Student Event Organizers Committee,

Committee Technical Lead

Jan 2026

📄 Certificates
